to me

Hi Alicia,

The Sketchbook apps do not gather any personal data of any kind. There is some aggregated data that we have access to by the way of the app stores, but it is diagnostic (installs, uninstalls, crashes, etc) and does not include PII. The only cases where we would have PII is when someone reaches out to us directly via email, as you did.

As we do not gather data through the apps, our policy is to not enter into contractual agreements related to this activity. If you have a simple form stating that we do not collect PII through the Sketchbook app, we are happy to take a look at that.

best,
LeeAnn
